## Samwise Service App Vision

### 1. Introduction

Although there are other applications that provide services on the market, they lack transparency and support for the users trying to find relevant services. The services are not properly reviewed and vetted for quality and legitimacy. Moreover, the process for service requesters is unclear and non customizable. As a result, our company is developing a service app that actually matches and provides customers with quality, well-vetted, and reliable services. The vision and purpose of the Samwise Service App are to provide service requesters with exceptional, well-vetted service support in home maintenance and care.

### 2. Positioning

Welcome to the future of service applications – a platform that not only connects you with reliable service providers but also champions eco-conscious practices. Introducing the Samwise Service App – your go-to platform for dependable services without hidden costs. What sets us apart is our dedication to fairness: we don't deduct any money from our service providers. Instead, we sustain our operations through non-intrusive advertisements and our premium subscription service. This unique approach allows us to support service providers, enabling them to

Samwise Service App	Version 1.5
Vision	Date: 16.12.2023

enhance the quality of their services. With us, you get reliable services, service providers get the support they need, and we thrive through ethical means, ensuring a win-win experience for everyone involved.

## 2.1 Problem Statement

### 2.1.1 Service Providers

The problem of	<ul style="list-style-type: none"> <li>significant platform fees imposed on service providers in existing service applications</li> <li>eco-conscious service providers facing challenges in reaching their audience</li> </ul>
affects	<ul style="list-style-type: none"> <li>the quality and accessibility of services provided</li> <li>the growth of sustainable practices</li> </ul>
the impact of which is	<ul style="list-style-type: none"> <li>forcing service providers to cut corners or limit the quality of their services to manage the financial burden.</li> <li>environmental degradation due to non-eco-friendly practices and dissatisfaction among eco-conscious service requesters.</li> </ul>
a successful solution would be	<ul style="list-style-type: none"> <li><b>Fair Fee Structure:</b> Implementing a fair fee structure ensures that service providers retain a higher percentage of their earnings.</li> <li><b>Transparent Transactions:</b> Providing transparent information about fees and environmental practices ensures that service providers can operate with clarity and integrity.</li> <li><b>Eco-Friendly Tagging:</b> Service providers committed to sustainable practices can be tagged as eco-friendly. This recognition helps them stand out in the marketplace, attracting environmentally conscious customers and promoting their eco-friendly initiatives.</li> <li><b>Supportive Ecosystem:</b> Creating a supportive environment within the platform fosters a community of like-minded service providers. Collaboration and shared knowledge among eco-friendly businesses can lead to the exchange of sustainable practices, further enhancing their commitment to environmental responsibility.</li> </ul>

### 2.1.2 Service Requester

The problem of	<ul style="list-style-type: none"> <li>service requesters receive subpar services</li> <li>environmental neglect and non-eco-friendly home service practices</li> </ul>
affects	<ul style="list-style-type: none"> <li>service requesters' satisfaction and trust in service platforms in negative ways</li> <li>their experience of unreliable and disqualified services</li> <li>resource wastage and environmental degradation</li> </ul>
the impact of which is	<ul style="list-style-type: none"> <li>disappointment and reluctance in using service platforms</li> <li>reduced access to high-quality and environmentally friendly services</li> </ul>
a successful solution would be	<ul style="list-style-type: none"> <li><b>Quality Assurance:</b> A robust review system allows service requesters to provide feedback on the services they receive. This feedback mechanism ensures</li> </ul>

Samwise Service App	Version 1.5
Vision	Date: 16.12.2023

	<p>high-quality services, enabling service requesters to make informed decisions based on the experiences of others.</p> <ul style="list-style-type: none"> <li>• <b>Transparent Transactions:</b> Clear information about fees and environmental practices enables service requesters to make informed choices. They can select service providers who meet their service requirements and align with their environmental concerns, fostering a sense of trust and satisfaction.</li> <li>• <b>Eco-Friendly Tagging:</b> Service requesters can easily identify and choose eco-friendly service providers. This empowers them to support service providers who align with their environmental values, encouraging the adoption of eco-conscious habits and contributing to environmental preservation.</li> <li>• <b>Supportive Ecosystem:</b> A platform that supports eco-friendly service providers creates a marketplace where service requesters can access reliable, high-quality, and environmentally responsible services. This supportive ecosystem encourages service requesters to engage with the platform confidently, knowing they are contributing to a greener, more sustainable future.</li> </ul>
